Welcome to your new MacBook Pro. We'd like to show you around.

If you don't have an Apple ID, you can create one in Setup Assistant.

Let's get started.

Your Mac automatically connects to the network you chose during setup.

To check the status of your wireless Internet connection, click the Wi-Fi icon.

The menu bar at the top has lots of useful information about your Mac.

The Dock at the bottom of the screen is a handy place to keep the apps you use most. It's also where you can open System Preferences, which lets you customize your desktop and other settings on your Mac. Click the Finder to open it.

The desktop is where you can find everything and do anything on your Mac.

Get to know your desktop.

The iCloud features you want to use.

Preferences, and click iCloud. Then sign in with your Apple ID and choose to use iCloud features.

iCloud stores your music, photos, documents, calendars, and more. And it wirelessly pushes them to your Mac, iPhone, iPad, iPod touch, and even your PC. All without docking or syncing. So when you buy a song on one device, it's free on all your other devices.

iCloud libraries let your latest photos appear everywhere you want to see them, automatically. And with Photo Stream, your PC can fill in the gaps when you're disconnected and when your Mac detects a problem, it opens OS X Utilities automatically.
Arrange apps any way you want, your open windows are replaced by Launchpad icon in the Dock, and apps on your Mac. Just click the Launchpad is the home for all the Mac App Store, it automatically When you download an app from or delete them from your Mac.

Group apps in folders by dragging one app on top of another.

Mission Control and go anywhere with just a click. Click anything to zoom in on it. and your desktop zooms out to a bird's-eye view of everything.

Add desktop spaces to the right of the top row to add a new space.

Reading List includes POP3 and IMAP—and works with most email standards—Mail lets you manage all your popular email services like Gmail, Yahoo! Mail, and AOL Mail. You can use Mail for one-click access.

Full-screen view on your Mac. And you can shop in the App Store for iPad, iPhone, and iTunes is also where you'll find the movies, TV shows, books, and more.

Calendars you want. Create and see all your calendars in a single window or choose to see only the calendar to create a new event. Select the view you prefer—day, week, month, or year.

Three dots mean your message has arrived. See when your messages from a conversation thread. See all the email Assistant will help you get started. The first time you open Mail, Setup email account you get with iCloud. also use Mail for the free me.com and go great together.

iPhoto is the best way to organize, browse photos, edit, and share your photos on your Mac. You can organize your photo library by Faces, Places, and cards. Or click Create to turn your favorite shots into photo books, calendars, cards. You need to quickly turn them in one place and gives you the in a project to create a great movie. Simply drop your clips into iMovie puts all your video clips into something memorable. You need to quickly turn them into something memorable.
