All you have to your new Mac from another Mac or a PC. The first time you start your network, transfer your stuff from another Mac or a PC, and create a user account for your Mac.

You'll also be able to log in with your Apple ID. This will allow you to shop in the App Store, iTunes Store, and Apple Online Store. It will let you keep in touch with your friends and family through iMessage and FaceTime. With your Apple ID, you can access your iCloud features like Mail, Contacts, and Calendar. You can use iCloud to store your documents, photos, and other files. It's also where you can access your Apple Music library and your Apple TV sports and movies. iCloud stores your music, photos, documents, calendars, and more. And with Photo Stream, your latest photos appear everywhere you want to see them, automatically. When you adjust your iCloud settings, open the Apple menu, select System Preferences, and click iCloud. Then sign in with your Apple ID and choose the iCloud features you want to use.

Your Mac automatically connects to the network you chose during setup. To check the status of your wireless Internet connection, click the Wi-Fi icon. The menu bar at the top has lots of useful information about your Mac. The Dock at the bottom of the screen is a handy place to keep the apps you use most. It's also where you can open System Preferences, which lets you customize your settings. The desktop is where you can find everything and do anything on your Mac. Use your trackpad to swipe to navigate, press down two times anywhere on the trackpad to double click, and brush two fingers along the trackpad to quickly magnify a web page. Or, with Tap to Click enabled, tap double-tap the surface.

You can often find answers to your questions, as well as instructions and troubleshooting information, in Help Center. Click the Finder icon, and choose Help in the menu bar, and choose Help Center. You can also use Safari to get online help. If your Mac detects a problem, it opens OS X Utilities automatically. Or you can open it manually by restarting your computer while holding down the Command and R keys. OS X Utilities can help you repair or reinstall your computer's flash storage, restore your software and data from a Time Machine backup, or erase your flash storage and reinstall OS X. If you have a problem with your Mac, OS X Utilities can help you repair it. You can find more information, watch demos, and learn even more about MacBook Air features at www.apple.com/macbookair. You can find Product Information Guide carefully before you first use your computer. An important note is that iCloud stores your music, photos, documents, calendars, and more. And with Photo Stream, your latest photos appear everywhere you want to see them, automatically. When you adjust your iCloud settings, open the Apple menu, select System Preferences, and click iCloud. Then sign in with your Apple ID and choose the iCloud features you want to use.

Arrange apps any way you want, a full-screen display of all your apps. Open Launchpad to see all your applications, including the Mac App Store, which automatically appears in Launchpad. You can group apps in folders by dragging one app left for easy access.

Mission Control gives you a bird's-eye view of everything running on your Mac. Click the Mission Control button to open Mission Control, which is the hub of mini-apps called widgets. Click anything to zoom in on it. Click the + button to add a new space. Two-finger gestures allow you to go back and forth between pages; swipe right and left with two fingers on the trackpad, or up or down with two fingers to magnify a page, and surf the web quickly and easily.

Click the glasses icon to get a quick overview of the sites you visit most often. Click the Top Sites row to add a new space. Click the full-screen button to go full screen. If you’re not connected to the Internet, Mail lets you manage all your email accounts from a single, ad-free inbox, even when you’re offline. Mail for one-click access.

iTunes is also where you’ll find the iTunes Store for new music, play your digital music and videos, and find and download thousands of apps for your Mac, from games and social networking to productivity apps and more. New apps install automatically.

Let iTunes search your music library and group songs that go great together. *Requires FaceTime-enabled device for both caller and recipient. Not available in all areas.*

iPhoto is the best way to organize, browse, edit, and share your photos. iPhoto can even organize shots into photo books, calendars, and cards.

iMovie puts all your video clips in a project to create one great video. iMovie can access all your clips. iPhones, iPods, and iPads, as well as most popular digital video cameras, appear here so you can access and use them. Trailers with just a few clicks. And you need to quickly turn them into something memorable. You can use editing tools and special effects in one place and gives you the power to independently create video projects.

With Calendar, you can create separate calendars—one for home, another for school, a third for work. Keep track of your busy schedule with Calendar. You can create events. To send photos by email, select the photo and click Share. And if you want to talk to someone right in Messages, you can start a video call. You can even Hollywood-style movie with your friends on a Mac, iPad, or iPod touch. With iCloud, you can send unlimited messages including text, photos, videos, and even audio messages. Just log in with your Apple ID, and Messages Assistant will help you get started.
