23   AirPort Time Capsule Specifications and Safety Guidelines
Congratulations on purchasing your AirPort Time Capsule. Read this guide to get started.

AirPort Time Capsule offers you fully automated backup for computers on your Wi-Fi network. Using the Time Machine application in Mac OS X v10.5.7 or later, it’s easy and automatic to back up all the Mac computers on your network to a single AirPort Time Capsule.

AirPort Time Capsule is also a fully featured AirPort Extreme Base Station that provides simultaneous dual-band wireless networking using the 802.11ac specification. When you set up your AirPort Time Capsule, it creates two high-speed Wi-Fi networks:

- A 2.4 gigahertz (GHz) network for 802.11b, 802.11g, and 802.11n devices, such as iPhone, iPod touch, and older computers
- A 5 GHz network for 802.11n, 802.11a, and 802.11ac devices, such as iPhone, iPad, Apple TV, and newer computers

Wi-Fi devices automatically join the network that provides the best performance and compatibility, and AirPort Time Capsule shares your broadband Internet connection with computers and devices on your network.
Chapter 1  Getting Started

- Link light
- Ethernet LAN
- USB
- Ethernet WAN
- Status light
- Power
- Reset button

Power cord (Your power cord may look different.)
## Ports on Your AirPort Time Capsule

AirPort Time Capsule has six ports on the back:

<table>
<thead>
<tr>
<th>Port</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌐 One Gigabit Ethernet Wide Area Network (WAN) port</td>
<td>For connecting a DSL or cable modem, or for connecting to an existing Ethernet network</td>
</tr>
<tr>
<td>🌐 Three Gigabit Ethernet Local Area Network (LAN) ports</td>
<td>For connecting Ethernet devices such as printers or computers, or for connecting to an existing Ethernet network</td>
</tr>
<tr>
<td>🌐 One USB port</td>
<td>For connecting a compatible USB printer, hard disk, or hub for connecting several devices</td>
</tr>
<tr>
<td>🌐 Power port</td>
<td>For connecting AirPort Time Capsule to an AC power source</td>
</tr>
</tbody>
</table>

Next to the power port is a reset button for troubleshooting your AirPort Time Capsule. The status light on the front shows its current status.
Plugging In Your AirPort Time Capsule

Before you plug in your AirPort Time Capsule, first connect the appropriate cables to the ports you want to use:

- Connect the Ethernet cable that’s connected to your DSL or cable modem (if you’ll connect to the Internet) to the Ethernet WAN port ((network access point)).
- Connect a USB cable from the USB port (interface) on your AirPort Time Capsule to a compatible USB printer, a hard disk, or a hub.
- Connect an Ethernet cable from any Ethernet device to any of the Ethernet LAN ports (Local Area Network).

After you connect the cables for all the devices you plan to use, connect the power cord to the power port and plug your AirPort Time Capsule into a power outlet. There is no power switch.

**Important:** Use only the power cord that came with your AirPort Time Capsule.

When you plug the AirPort Time Capsule power cord into a power outlet, the status light glows amber during startup, and then flashes amber during setup. The status light glows green after your AirPort Time Capsule is set up and connected to the Internet or a network. When you connect Ethernet cables to the Ethernet ports, the lights above them glow solid green.
The AirPort Time Capsule Status Light

The following table explains the AirPort Time Capsule light sequences and what they indicate.

<table>
<thead>
<tr>
<th>Light</th>
<th>Status/description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Your AirPort Time Capsule is unplugged.</td>
</tr>
<tr>
<td>Solid amber</td>
<td>Your AirPort Time Capsule is starting up.</td>
</tr>
<tr>
<td>Flashing amber</td>
<td>Your AirPort Time Capsule can't establish a connection to the network or the Internet, or is encountering a problem. Use AirPort Utility to get information about what might cause the status light to flash amber. See “If Your AirPort Time Capsule Status Light Flashes Amber” on page 19.</td>
</tr>
<tr>
<td>Solid green</td>
<td>Your AirPort Time Capsule is on and working properly.</td>
</tr>
<tr>
<td>Flashing amber and green</td>
<td>There may be a problem starting up. Your AirPort Time Capsule will restart and try again.</td>
</tr>
</tbody>
</table>

With AirPort Time Capsule, you can:

- Use the Time Machine application in Mac OS X v10.5.7 or later to back up all the Mac computers in your home.
- Create a password-protected Wi-Fi network, and then connect to the Internet and share the connection with other computers and Wi-Fi devices, such as iPad, iPhone, iPod touch, and Apple TV.
- Create a guest network, with or without password protection, to give wireless Internet access to friends and visitors. Devices that connect to the guest network have access to the Internet, but not to your local network.
- Connect a USB printer or hard disk to your AirPort Time Capsule. All the computers on the network can access the device.
Chapter 1  Getting Started

Computer

2.4 or 5 GHz

iPad

2.4 or 5 GHz

iPhone or iPod touch

AirPort Time Capsule

Cable/DSL modem

to Ethernet WAN port
to Internet

Network printer
to USB port
Use your Mac or an iOS device to set up your AirPort Time Capsule.

You can set up your AirPort Time Capsule to do one of the following:

• Create a new network that wireless computers and devices can use to connect to the Internet and to each other.

• Extend an existing network. If the network is connected to the Internet, all the computers and wireless devices on the AirPort network can use the Internet connection.

Computers connected to your AirPort Time Capsule using Ethernet can also access the network to share files and connect to the Internet.

If you’re using your AirPort Time Capsule to connect to the Internet, you need a broadband (DSL or cable modem) account with an Internet service provider, or a connection to the Internet using an existing Ethernet network. If you received specific information from your ISP (such as a static IP address or a DHCP client ID), you may need to enter it in AirPort Utility. Have this information available before you set up your AirPort Time Capsule.
Setting Up AirPort Time Capsule Using a Mac
You’ll need:
• A Wi-Fi enabled Mac computer or a Mac computer connected to your AirPort Time Capsule with an Ethernet cable (in order to set it up using Ethernet)
• OS X v10.7.5 or later
• AirPort Utility v6.3 or later
Use Software Update to get the latest version of OS X and AirPort Utility.
To set it up:
1  Open AirPort Utility, located in the Utilities folder in the Applications folder.
2  Select your AirPort Time Capsule and click Continue. If you don’t see the AirPort Time Capsule you want to configure, choose it from the Wi-Fi status menu in the menu bar.
3  Follow the onscreen instructions to create a new network or extend an existing network.

Setting Up AirPort Time Capsule Using an iOS device
You’ll need:
• An iPad, iPhone, or iPod touch
• iOS 6.1 or later
Check Settings on your iOS device for the latest version of iOS.
To set it up:
1  Tap Settings on the Home screen, then tap Wi-Fi.
2  Tap the name of your AirPort Time Capsule.
3  Follow the onscreen instructions to create a new network or extend an existing network.
Setting Advanced Options

To set advanced options, use AirPort Utility on your computer or download AirPort Utility for iOS from the App Store. You can set up a new AirPort Time Capsule or configure advanced settings, such as advanced security options, closed networks, DHCP lease time, access control, IPv6, and more.

To set advanced options or make changes to a network you’ve already set up:

1. Choose the wireless network you want to change.
   - On a Mac, use the Wi-Fi status menu in the menu bar.
   - On an iOS device, choose the network in Wi-Fi settings.

If you haven’t set up your AirPort Time Capsule, the default network name is Apple Network XXXXXX, where XXXXXX is the last six digits of the AirPort ID.

2. Open AirPort Utility.

3. Select the AirPort Time Capsule you want, then click Edit.

4. If you’re prompted for a password, enter it.

5. Adjust the settings you want for your AirPort Time Capsule and your network.

Using Time Machine with Your AirPort Time Capsule

With the Time Machine application you can back up all your Mac computers, including your photos, music, movies, and documents.

After you set up Time Machine, it automatically backs up your computer on a regular basis.

If you’re using Mac OS X v10.5.7 or later, the first time you connect to your AirPort Time Capsule, Time Machine asks if you’d like to use it to back up your computer. Click “Use as Backup Disk,” and Time Machine takes care of the rest.
Use Time Machine preferences to set up automatic backups, use a different backup disk, or adjust other settings.

**To set up or adjust Time Machine on a computer using Mac OS X v10.5.7 or later:**

1. Choose Apple > System Preferences, and then click Time Machine.
2. Slide the switch to ON and click Select Disk.
3. Choose your AirPort Time Capsule and click Use Disk.

**Important:** Your first backup with AirPort Time Capsule and Time Machine could take overnight or longer, depending on how much data you’re backing up. To speed up the initial backup, connect your AirPort Time Capsule to your computer using Ethernet. In each subsequent backup, Time Machine backs up only files that have changed since the previous backup, so the backups don’t take as long.

AirPort Time Capsule is a great wireless backup solution for portable computers. Since the first backup can take some time, plug your portable into a power adapter—this conserves battery power and guarantees that the backup won’t be interrupted.

If you shut down your Mac or put it to sleep during a backup, Time Machine stops the backup and then continues where it left off after your Mac starts up again.

For more information about Time Machine, choose Help > Help Center from the Finder on Mac, and then enter Time Machine in the search field.

### Adding a WPS Printer to Your Password-Protected Network

If your network is password-protected using WPA Personal or WPA/WPA2 Personal, you can add a WPS-compatible printer to your network without requiring the network password.

When you allow a printer to access your network, the printer’s name and wireless MAC address are stored in the access control list of AirPort Utility until you remove it from the list.
To add a WPS printer:

1. Open AirPort Utility on your Mac, select your AirPort Time Capsule, and then click Edit. Enter the password if necessary.

2. Choose Add WPS Printer from the Base Station menu.

3. Specify how you want the printer to access the network:
   - Select PIN to enter the eight-digit number provided by the printer.
   - Select “First attempt” to allow network access to the printer joining the network.

Once the printer is connected to the network, use Print & Scan preferences to choose it. See the documentation that came with your printer for more information.

If you want to remove the printer, click Network in AirPort Utility, click Timed Access Control, select the printer, and then click Delete (−).
Tips and Troubleshooting

You can quickly solve most problems with your AirPort Time Capsule by following the advice in this chapter.

Best Locations for AirPort Time Capsule

The following recommendations can help your AirPort Time Capsule achieve the best wireless range and network coverage.

- Place your AirPort Time Capsule in an open area where there are few obstructions, such as large pieces of furniture or walls. Place it away from metallic surfaces.
- Place your AirPort Time Capsule on a table or surface with adequate air circulation under and around it. Don’t place your AirPort Time Capsule on a carpet or other soft material, as the material can block the airflow vents.
- If you place your AirPort Time Capsule behind furniture, keep at least an inch (2.54 centimeters) of space between the AirPort Time Capsule and the furniture.
- Avoid placing your AirPort Time Capsule in an area surrounded by metal surfaces on three or more sides.
- If you put your AirPort Time Capsule in an entertainment center with your stereo equipment, don’t surround AirPort Time Capsule with audio, video, or power cables. Place it so the cables are to one side. Keep as much space as possible between AirPort Time Capsule and the cables.
• Don’t place books, papers, or other objects on top of the AirPort Time Capsule. These may interfere with AirPort Time Capsule cooling.
• Place your AirPort Time Capsule at least 25 feet (8 meters) from any microwave oven, 2.4 GHz cordless phone, or other source of interference.

Avoiding Interference
The farther away the interference source, the less likely it is to cause a problem. The following can interfere with AirPort communication:
• Microwave ovens
• Direct Satellite Service (DSS) radio frequency leakage
• The original coaxial cable that might have come with a satellite dish. Contact the device manufacturer and get newer cables.
• Certain electrical devices such as power lines, railroad tracks, and power stations
• Cordless telephones that operate in the 2.4GHz or 5GHz range. If you have problems with your phone or AirPort communication, change the channel your AirPort Time Capsule uses, or change the channel your phone uses.
• Nearby base stations using adjacent channels. For example, if device A is set to channel 1, base station B should be set to channel 6 or 11.

If You Can’t Connect to the Internet
• Try connecting to the Internet directly from your computer. If you can’t connect, check to make sure your network settings are correct. If they appear to be correct and you still can’t connect, contact your Internet service provider (ISP).
• Make sure you’re connecting to the correct wireless network.
If You Forget Your AirPort Time Capsule or Network Password

If you forget your AirPort Time Capsule or network password, you can reset it.

To reset your password:

1. Use something pointed (such as a ballpoint pen) to press and hold the reset button for one second.

*Important:* If you press the reset button for more than one second, you may lose your network settings.

2. Select your AirPort network.

   • On a Mac, use the Wi-Fi status menu in the menu bar to select the network created by your AirPort Time Capsule (the network name doesn’t change).
   • On an iOS device, choose the network in Wi-Fi Settings.

3. Open AirPort Utility.

   If AirPort Utility isn’t installed on your computer, you can download it from support.apple.com/downloads/#airport. If AirPort Utility isn’t installed on your iOS device, you can install it from the App Store.

4. Select your AirPort Time Capsule and click Edit.

5. Click Base Station and enter a new password for your AirPort Time Capsule.

6. Click Wireless and choose an encryption method from the Wireless Security pop-up menu. Then enter a new password for your AirPort network.

7. Click Update to restart your AirPort Time Capsule and load the new settings.
If Your AirPort Time Capsule Isn’t Responding
Try unplugging it and plugging it back in.

If your AirPort Time Capsule still won’t respond, you may need to reset it to the factory default settings.

*Important:* Resetting your AirPort Time Capsule to factory default settings erases all of the current settings and resets them to their original state.

To reset your AirPort Time Capsule to its factory settings:
- Use something pointed (such as a ballpoint pen) to press and hold the reset button until the status light flashes quickly (about 5 seconds).

Your AirPort Time Capsule resets with the following settings:
- Your AirPort Time Capsule receives its IP address using DHCP.
- The network name is reset to Apple Network XXXXXX (where XXXXXX is replaced with the last six digits of the AirPort ID).
- The AirPort Time Capsule password is set to public.

If your AirPort Time Capsule still doesn’t respond, try the following:
1. Unplug your AirPort Time Capsule.
2. Use something pointed to press and hold the reset button while you plug in your AirPort Time Capsule.

If Your AirPort Time Capsule Status Light Flashes Amber
The Ethernet cable may not be connected properly, or there may be a problem with your Internet service provider or with the AirPort Time Capsule settings.
If you’re connected to the Internet with a DSL or cable modem, the modem may have lost its connection to the network or the Internet. Even if the modem seems to be working properly,
try disconnecting it from its power supply, waiting a few seconds, and then reconnecting it. Make sure your AirPort Time Capsule is connected directly to the modem via Ethernet before reconnecting power to the modem.

For more information about why the light is flashing, open AirPort Utility, select your AirPort Time Capsule, and then click Edit to display information about the flashing light.

You can also select “Monitor base station for problems” in AirPort preferences. If the base station has a problem, AirPort Utility opens and walks you through solving the problem.

If You Want to Update Your AirPort Time Capsule Software
Apple periodically updates AirPort Utility. To download the latest version:

• On a Mac, go to www.apple.com/support/airport.
• On an iOS device, go to the App Store.

You can also update your AirPort Time Capsule firmware when it becomes available.

To update your AirPort Time Capsule firmware from a Mac:
1 Open AirPort Utility.
2 Select your AirPort Time Capsule.
3 Click Update next to the version number.

To update your AirPort Time Capsule firmware from an iOS device:
• Open AirPort Utility, select your AirPort Time Capsule, and then tap Version.
Learning More, Service, and Support

You can find more information about using your AirPort Time Capsule on the web and in onscreen help.

Online Resources
For the latest information about the AirPort Time Capsule, go to www.apple.com/airport.
To register your AirPort Time Capsule, go to www.apple.com/register.
For AirPort support information, forums with product-specific information and feedback, and the latest Apple software downloads, go to www.apple.com/support.
For support outside the United States, go to www.apple.com/support, and then choose your country from the pop-up menu.

Onscreen Help
To learn more about using AirPort Utility with your AirPort Time Capsule, open AirPort Utility on your Mac and choose Help > AirPort Utility Help.
Obtaining Warranty Service
If your AirPort Time Capsule appears to be damaged or doesn’t function properly, follow the advice in this booklet, the onscreen help, and the online resources.

If your AirPort Time Capsule still doesn’t function properly, go to www.apple.com/support and click Check Your Service & Support Coverage for information about obtaining warranty service.

Finding the Serial Number of Your AirPort Time Capsule
The serial number is printed on the bottom of your AirPort Time Capsule.
AirPort Time Capsule Specifications and Safety Guidelines

AirPort Time Capsule Specifications
• Frequency Band: 2.4GHz and 5GHz
• Standards: 802.11 DSSS 1 and 2 Mbps standard, 802.11a, 802.11b, 802.11g, 802.11n, and 802.11ac specifications

Interfaces
• 1 RJ-45 10/100/1000Base-T Gigabit Ethernet WAN (オス)
• 3 RJ-45 10/100/1000Base-T Gigabit Ethernet LAN (カリ)
• Universal Serial Bus (USB) 2.0 (Ψ)
• Simultaneous dual-band 802.11ac Wi-Fi

Environmental Specifications
• Operating Temperature: 32° F to 95° F (0° C to 35° C)
• Storage Temperature: –13° F to 140° F (–25° C to 60° C)
• Relative Humidity (Operational): 20% to 80% relative humidity
• Relative Humidity (Storage): 10% to 90% relative humidity, noncondensing

Size and Weight
• Length: 3.85 inches (98.0 mm)
• Width: 3.85 inches (98.0 mm)
• Height: 6.6 inches (168 mm)
• Weight: 3.26 pounds (1.48 kilograms)
Hardware Media Access Control (MAC) Addresses

The AirPort Time Capsule has three hardware addresses:

- *AirPort ID*: Two addresses are used to identify the AirPort Time Capsule on a wireless network.
- *Ethernet ID*: You may need to provide this address to your ISP to connect your AirPort Time Capsule to the Internet.

Using Your AirPort Time Capsule Safely

- The only way to shut off power completely to your AirPort Time Capsule is to disconnect it from the power source.
- When connecting or disconnecting your AirPort Time Capsule, always hold the plug by its sides. Keep your fingers away from the metal part of the plug.
- Your AirPort Time Capsule should not be opened for any reason, even when it’s unplugged. If your AirPort Time Capsule needs service, see “Learning More, Service, and Support” on page 21.
- Never force a connector into a port. If the connector and port don’t join with reasonable ease, they probably don’t match. Make sure that the connector matches the port and that you’ve positioned the connector correctly in relation to the port.
Avoid Wet Locations

**WARNING:** To reduce the chance of shock or injury, do not use your AirPort Time Capsule in or near water or wet locations.

- Keep your AirPort Time Capsule away from sources of liquid, such as drinks, washbasins, bathtubs, shower stalls, and so on.
- Protect your AirPort Time Capsule from direct sunlight, and rain or other moisture.
- Take care not to spill any food or liquid on your AirPort Time Capsule. If you do, unplug it before cleaning up the spill.
- Do not use your AirPort Time Capsule outdoors. AirPort Time Capsule is an indoor product.

Do Not Make Repairs Yourself

**WARNING:** Do not attempt to open your AirPort Time Capsule or disassemble it. You run the risk of electric shock and voiding the limited warranty. No user-serviceable parts are inside.

About Handling
Your AirPort Time Capsule may be damaged by improper storage or handling. Be careful not to drop your AirPort Time Capsule when transporting it.
Regulatory Compliance Information

FCC Declaration of Conformity
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

Radio and Television Interference
This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Apple's instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether your computer system is causing interference by turning it off. If the interference stops, it was probably caused by the computer or one of the peripheral devices.

If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures:

• Turn the television or radio antenna until the interference stops.
• Move the computer to one side or the other of the television or radio.
• Move the computer farther away from the television or radio.
• Plug the computer into an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.)

If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. Or, consult an experienced radio/television technician for additional suggestions.

Important: Changes or modifications to this product not authorized by Apple Inc. could void the EMC compliance and negate your authority to operate the product.

This product was tested for FCC compliance under conditions that included the use of Apple peripheral devices and Apple shielded cables and connectors between system components. It is important that you use Apple peripheral devices and shielded cables and connectors between system components to reduce the possibility of causing interference to radios, television sets, and other electronic devices. You can obtain Apple peripheral devices and the proper shielded cables and connectors through an Apple-authorized dealer. For non-Apple peripheral devices, contact the manufacturer or dealer for assistance.

Wireless Radio Use
This device is restricted to indoor use when operating in the 5.15 to 5.25 GHz frequency band.

Cet appareil doit être utilisé à l’intérieur.
この製品は、周波数帯域 5.18 〜 5.32 GHz で動作しているときは、屋内においてのみ使用可能です。
Exposure to Radio Frequency Energy
The radiated output power of the AirPort Card in this device is below the FCC and EU radio frequency exposure limits for uncontrolled equipment. This device should be operated with a minimum distance of at least 20 cm between the AirPort Card antennas and a person’s body and must not be co-located or operated with any other antenna or transmitter subject to the conditions of the FCC Grant.

Canadian Compliance Statement
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Industry Canada Statement
Complies with the Canadian ICES-003 Class B specifications. Operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

European Compliance Statement
This product complies with the requirements of European Directives 2006/95/EC, 2004/108/EC, and 1999/5/EC.

European–EU Declaration of Conformity

De plus, les utilisateurs devraient aussi être avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu’ils ont la priorité) pour les bandes 5 250-5 350 MHz et 5 650-5 850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

European Compliance Statement
This product complies with the requirements of European Directives 2006/95/EC, 2004/108/EC, and 1999/5/EC.

European–EU Declaration of Conformity

These radars could cause interference and/or damage to LE-LAN devices.

Cet appareil est conforme aux normes CNR exemptes de licence d’Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne doit pas provoquer d’interférences et (2) cet appareil doit accepter toute interférence, y compris celles susceptibles de provoquer un fonctionnement non souhaité de l’appareil.

Industry Canada Statement
Complies with the Canadian ICES-003 Class B specifications. Operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Industry Canada Statement
Complies with the Canadian ICES-003 Class B specifications. Operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Disposal and Recycling Information

This symbol indicates that your product must be disposed of properly according to local laws and regulations. When your product reaches its end of life, contact Apple or your local authorities to learn about recycling options.

For information about Apple's recycling program, go to www.apple.com/recycling.

European Union — Disposal Information

The symbol above means that according to local laws and regulations your product and/or its battery shall be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities. The separate collection and recycling of your product and/or its battery at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

Union Européenne — informations sur l’élimination
Le symbole ci-dessus signifie que, conformément aux lois et réglementations locales, vous devez jeter votre produit et/ou sa batterie séparément des ordures ménagères. Lorsque ce produit arrive en fin de vie, apportez-le à un point de collecte désigné par les autorités locales. La collecte séparée et le recyclage de votre produit et/ou de sa batterie lors de sa mise au rebut aideront à préserver les ressources naturelles et à s’assurer qu’il est recyclé de manière à protéger la santé humaine et l’environnement.

Union Européenne — Informationen zur Entsorgung

Unione Europea — informazioni per lo smaltimento
Il simbolo qui sopra significa che, in base alle leggi e alle normative locali, il prodotto e/o la sua batteria dovrebbero essere riciclati separatamente dai rifiuti domestici. Quando il prodotto diventa inutilizzabile, portalo nel punto di raccolta stabilito dalle autorità locali. La raccolta separata e il riciclaggio del prodotto e/o della sua batteria al momento dello smaltimento aiutano a conservare le risorse naturali e assicurano che il riciclaggio avvenga nel rispetto della salute umana e dell’ambiente.

O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 规定的限量要求以下。
X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 规定的限量要求。

根据中国电子行业标准 SJ/T11364-2006，本产品及其某些内部或外部组件上可能带有环保使用期限标识。取决于组件和组件制造商，产品及其组件上的使用期限标识可能有所不同。组件上的使用期限标识优先于产品上任何与之相冲突的或不同的使用期限标识。
